ABSTRACT

The purpose of this study was to discover weaknesses and strengths in present teacher preparation programs in Alabama. Statewide committees made a survey of all teacher education programs in order to determine student requirements and regulations for entrance, retention, and completion. Competencies evaluated were: (1) planning; (2) instructional strategies; (3) managerial competencies; and (4) professional competencies. Teachers filled out self-evaluation forms, which were judged on the basis of the effectiveness of programs rather than the competency of the teachers. Employers evaluated teachers on ability to perform assigned duties. Some conclusions drawn from an analysis of results: (1) There are flaws in the educational programs in Alabama, although responses indicate most programs are doing a satisfactory or good job. (2) Judgment of the competencies taught best in the schools and those taught least effectively indicated that all education programs need strengthening. (3) Generally, administrators evaluated teachers higher than the teachers evaluated their preparation programs. The report includes tables on teachers' and administrators' evaluation scores and percent of total responses for each competency studied. Three appendices present the questionnaires prepared for this study and the responses to them as well as computer printouts of evaluations. (JD)

# REPORT ON EVALUATION OF TEACHER PREPARATION PROGRAMS IN ALABAMA

## I. Background for the Project

In January 1972 the State Board of Education passed a resolution which laid the basis for Board Action to place greater emphasis on teacher competency. This resolution provided for teachers to be placed in teaching positions in fields where they are trained. Certification requirements were to be upgraded. Teacher preparation programs are to be reviewed by broadly representative teams. These teams are to be appointed by the State Superintendent of Education and approved by the State Board of Education. Their purposes are to be to approve teacher preparation programs and maintain appropriate standards for certification.

The need to focus attention on upgrading teacher preparation and on giving an accounting of the effectiveness of schools is a concern of parents, school boards, legislators and educators throughout the country as well as in Alabama.

Integration of teachers and pupils during the past decade brought together teachers and pupils of different backgrounds and focused attention on poor teachers both black and white.

Employers of teachers can be more selective than at any time during the past because the supply of teachers has increased. Institutions with teacher preparation programs are in a more competitive market.

Leaders of education have a moral and professional responsibility to give suggestions for improving teacher preparation programs on a statewide basis. They have a responsibility to take appropriate action to implement measures that assure the highest quality our resources will provide.

Through the implementation of this project, Alabama has taken the initiative to evaluate teacher preparation programs and focus attention on a vital problem facing Alabama and the Nation. The goal is to assure every pupil a highly competent teacher every minute the pupil is in school. This goal may be very difficult to fully achieve, but we can certainly move much nearer to its achievement than we have been able to do in the past. One purpose of the project is to discover the strengths and weaknesses in the present teacher preparation programs. Once these strengths and weaknesses have been determined, improvements can be made which will be beneficial to the pupils, teachers, employing boards of education and the people of Alabama.

This project has some limitations. One limitation is that a portion of it is based on the subjective judgment of teachers and their employers. However, the subjective judgments used by teachers and administrators who are themselves products of the programs being evaluated may be the best measure yet devised to determine the quality of these programs.

To implement the massive project of evaluating teacher preparation programs, a statewide committee of thirty-eight persons was appointed by the State Board of Education. This Committee has representatives from every segment of education, including classroom teachers, supervisors and administrators from Kindergarten through the University. It involves State Department of Education personnel and lay citizens.

Three sub-committees were appointed from the committee of thirty-eight. One sub-committee worked on the Entrance Requirements for Teacher Preparation Programs, the second on Completion Requirements and the third on the Evaluation of Teacher Preparation Programs of the various institutions. The third sub-committee developed the evaluation forms to be used in the project. I B M printed the forms. Every County and City School System was requested to participate. All the institutions of higher education which have teacher preparation programs were invited to participate.

① Entry
② Exit
③ Quality

A steering committee was selected composed of a state board of education member, two deans of colleges of education, a member of the State Department of Education, the president of the Alabama Education Association and the Director of the project.

A series of eight district meetings was held with one meeting being held in each State Board of Education member's district. There were 814 representatives of the school systems, institutions of higher education, State Department of Education personnel and lay representatives who attended these meetings. At these meetings the forms were distributed and information was given on the purposes and possible outcomes of the project. Instructions on how to complete the forms, the mechanics as to deadline for delivery and the giving of comparable data were discussed. State School Board members made statements of endorsement of the project. All teachers were requested to complete the self-evaluation forms. All employers of teachers were requested to complete a separate form designed to evaluate the teacher's ability to perform on a list of competencies. The competencies evaluated were listed under four separate areas, (1) Planning, (2) Instructional Strategies, (3) Managerial Competencies and (4) Professional Competencies. Each of the above major areas contains several component parts. There are thirty items on each of the evaluation forms. The information received has been computerized and pertinent data has been put into a form which will enable the State Board of Education, institutions of higher education and employing authorities to evaluate the situation and devise ways and means to strengthen teacher preparation programs.

All 127 school systems participated in the project by completing the forms which were submitted to them. Likewise, all twenty-seven institutions of higher education with teacher preparation programs participated. The self-evaluation form was completed by 32,790 teachers and the employers of these teachers completed a like number of forms. This represents approximately 96 percent of all the teachers in the State of Alabama. The statewide sampling, therefore, is ample for reliable results. The information received on the self-evaluation forms is based on the effectiveness of the teacher preparation programs rather than on the competency of the teacher, whereas, the information on the employer's evaluation form was based on the teacher's ability to perform his or her assigned duties.

The forms provide information on every teacher training institution and each county and city system by identifying the institutions and systems; but, no teacher and no administrator making the evaluation is personally identified. The number of years of experience of the teacher, the field of preparation and the year the program was completed are identified. The form, among other things, shows if the teacher is holding a bachelor's degree, a master's degree or a AA Certificate. It shows the teacher's assigned teaching field. The administrator's form gives the evaluator's position in the school system and the basis for his or her evaluation of the teacher employed.

## REPORT FROM SUB-COMMITTEE ON ENTRANCE--RETENTION REQUIREMENTS
(The Following Statements Are Based On Data Shown In Appendix "A")

The committee's charge was to accumulate information about the admission and retention policies of all TEP's in Alabama; to organize this information; analyze it; and then report to the Steering Committee and the full Statewide Committee. The committee prepared a questionnaire with items related to admission and retention which was sent to all TEP's in the state. Primary emphasis of the questionnaire was on undergraduate programs; however, a great deal of data were gathered on "A" and "AA" certification programs. A total of 27 institutions in the state prepared teachers at the time the survey was conducted. Of this number, 14 are private institutions and 13 are publicly supported.

The questionnaire is contained in Appendix "A". The data requested at the undergraduate level covered the period September, 1974 - September, 1975, and those requested for the graduate programs covered the period of June, 1974 - September, 1975.

There were 27 institutions offering TEP's in Alabama last year. One institution has 3 campuses where degrees are available, and this was counted as a single institution. Of the 27, 12 offer only "B" certification; 15 offer "B" and "A" certification; 11 offer "A", "B", and "AA" certification; and 2 offer the doctorate in education. All of the institutions have state approval at some level, 25 report SACS accreditation at some level, and 14 have NCATE accreditation at some level.

"B" Certificate:

Twenty-five of the IHE's report that students can enroll in arts and sciences units and complete the TEP, one reports that enrollment must be in the education unit, and one did not respond to this. Of the 25 programs in which students can enroll in A & S or education, 13 report that students take the same discipline courses regardless of where enrolled, and 12 report that this is not always required. All programs report that discipline professors help plan teaching majors.

For the 12 months period preceding the study, 25 institutions reported recommending 5,160 "B" certificates, 3,635 "A" certificates, and 789 "AA" certificates. (Two very small institutions did not report. This total of 9,584 certificates represented about 60% of certificates issued by the state during this period. The remainder could have come from out-of-state, people not applying through institutions, etc.)

Of all certificates reported, "B" level made up 54%; "A" = 38%; and "AA" = 8%. The Md. school recommended 113 "B" certificates; the 5 largest producers recommended 55% of all certificates at this level. The range of certificates recommended was 15 to 854.

Of the 15 schools recommending "A" certification, the Md. school recommended 186; the range of certificates recommended was 7 to 836; and the 5 largest schools recommended 67% of "A" certificates.

Of the 11 schools recommending "AA" certificates, the Md. school produced 28; the range was 3 to 258; and the 5 largest schools produced 88% of the total.

Twenty-six of the 27 schools reported admission requirements the same for getting into the school or department of education as for other units of the university; however, 24 reported additional admission requirements for the TEP itself, and all of these required committee action for admission. Fourteen of the 27 schools require higher GPA's for graduation from the TEP than is required for graduation from other programs, and 12 require higher GPA's for admission to student teaching than is required for overall graduation. The range of GPA's for admission to student teaching is 1.0 to 1.5 on a 3 point scale.

All IHE's require cooperating teachers to assist in evaluating student teachers, and 19 of the 27 IHE's have offices or committees to follow up graduates.

Nineteen of the 27 schools reported Md. ACT scores on all freshmen over the past two years, and 13 of those gave scores for education vs non-education students. Of the 13 schools reporting on both education and non-education students, the range of non-education Md. ACT scores was 9.5 to 24.0; for education students it was 8.5 to 23.5. The Md. ACT school score of the 13 reporting was 20 for non-education students and 19.8 for TEP students.

All schools require a high school diploma (or equivalent) for initial admission to college, 4 specify that this must be at least a "C" average, many specify particular courses, at least 3 have prediction formulas where the student must be predicted to earn a "C" average as a freshman in college based on H.S. grades and test scores; 19 require "acceptable" test scores (only 3 specify what this is), and several require reference letters. These requirements are for admission to the institution as a whole, and institutions vary with respect to acceptable test scores. Twenty-two of the institutions require formal committee action for admission to TEP; and of these, 10 require higher than a "C" average during the first two years of college for admission. The range of percentage of students denied admission into the TEP is from 0 to 43%, and the Md. percentage denied is 7%; 5 schools did not report. Six of the 27 schools have no formal "probation" or "drop" policy, but deal with this on an individual basis. The remaining 21 normally put students on probation when the overall GPA falls below "C" and drop them from school following a term on probation if the GPA has not reached an acceptable level. As noted, 13 of the 27 schools require a higher GPA to get the "B" certificate in education than is required by the institution for graduation. Fourteen require the same GPA.

### "A" Certificate:

Of the 15 schools offering the "A" certificate, 5 require at least a 1.5 undergraduate average (on a 3.0 scale) plus "satisfactory" test scores to get into the program unconditionally; 4 require at least 1.5 GPA and no scores; 3 require at least a 2.0 GPA plus specified test scores; 2 have a prediction formula based on GPA and test scores; and 1 requires the bachelor's degree.

For conditional admission, all require at least a 1.0 average and/or "acceptable" or specific test scores. Two require at least a 1.5 GPA and specific test scores.

The range of semester hours for the "A" certificate required in one's teaching discipline among the 15 schools is 6 to 16; the Md. is 14. All schools require a comprehensive examination to complete the master's degree (either written or oral), and no school requires a master's thesis, although all have a thesis option available. Twenty of the schools require a 2.0 (B) average in graduate school to qualify for the master's degree, one requires a 1.5, one requires a 1.7, and this grading system is not applicable at one school.

The total number of master's ("A") students admitted to the 15 programs during the 15 months prior to September, 1975 was 8,167; the number admitted to the Md. school was 506; the range was 3 to 1,732; and the 5 largest schools admitted 67% of the total. For most schools, graduate students admitted on probation must earn a "B" average on the first 4 courses taken, and in most programs students are automatically dropped upon earning 3 "C" grades.

### "AA" Certificate:

Ten institutions reported admitting 1,663 "AA" students during the 15 months prior to September, 1975. The number of students admitted ranged from 20 to 673; and the number admitted by the Md. school was 101. The 5 largest schools admitted 83% of these students. All schools require at least 30 semester hours beyond the master's degree for the "AA" recommendation. The number of semester hours required in the teaching discipline for the "AA" ranges from 6 to 20, with a Md. of 9. Five of the schools require a thesis or project for the "AA" program, and 5 do not. Five require either a written and/or oral exam for the "AA" and 5 do not. Eight of the 10 institutions require a 2.0 (B) average for "AA" recommendation and 2 report that this grading system is not applicable. The probation and drop policies for the "AA" are generally the same as for the master's programs.

Summary Statement:

1. There are 27 education programs in Alabama. Fourteen are private institutions; 13 are public. The 13 public institutions produce 85% of all teachers at the "B" level of certification, 97% at the "A" level, and 100% at the "AA" level.

2. Of the 27 institutions with teacher education programs, 14 have NCATE accreditation at some level; 25 have SACS accreditation; and 2 did not report.

3. In all schools but one, a student may "major" in an A & S unit and complete a teaching certificate at the same time. The "major" may be somewhat different for students in A & S and those in education in about 1/2 of the schools.

4. About 50% of all certificates recommended by Alabama IHE's are at the "B" level. However, the trend shows that this is quickly changing and it is likely that most certificates issued this year and for several years to come will be at the "A" and "AA" levels. In other words, the greatest enrollment in teacher education will be at the graduate level and institutions will have to pay more attention to "upgrading" the working teacher.

5. Five institutions produced 55% of all reported "B" certificates during the period studied; 5 produced 67% of all "A" certificates, and 5 produced 88% of all "AA" certificates. However, these were not the same 5 schools in all 3 cases.

There were 5 schools which admitted 67% of all "A" level students during the 12 months prior to September 1975, and 5 schools admitted 83% of all "AA" level students during this same period. However, the 5 schools were not the same at the "A" and "AA" levels. Only one school was among the 5 in all categories. This suggests a clear shift in enrollment patterns around the state, especially at the graduate level.

6. Admission policies vary. All schools require a H.S. diploma or equivalent, and most require test scores. But often there is no specific test score cited. Apparently, the most common approach is to use the H.S. grades and test scores in combination to make admission decisions.

Most schools require a higher GPA to get into the TEP and student teaching than is required for graduation in other areas of study. Relatively few applicants are turned down for TEP's. Most schools point out that those students not likely to be accepted do not apply.

Most schools have clear probation and drop policies, and all appear to use guidance conferences with students, especially in the student teaching process.

7. Teacher education programs in the state vary from small to large. And while there is a large variation among institutions in test scores of students admitted, there is little difference in test scores between education and non-education students at a given institution.

8. The procedure by which students get into and complete teacher education programs at most of the institutions are reasonably well defined. These procedures themselves have a great deal in common on paper. There has been no effort to evaluate the effectiveness of these procedures at the various institutions nor to assess their absolute worth and appropriateness as procedures.

Note: The following abbreviations were used in the preceding report:

A & S - Arts and Sciences
ACT - American College Test
GPA - Grade Point Average
H.S. - High School
IHE - Institution of Higher Education
TEP - Teacher Education Program

## REPORT FROM SUB-COMMITTEE ON COMPLETION REQUIREMENTS

Each institution of higher education completed the Questionnaire on Completion Requirements. Practically all of the items on the questionnaire were designed to provide descriptive as well as quantitative information concerning programs in a given institution. For this reason, the responses to these items do not lend themselves to the calculations of means nor to the application of other statistical techniques. A large number of the items were designed to elicit open ended responses. Almost all of the institutions reporting attached supporting documents.

It is the opinion of the sub-committee that the data for a given institution will be most meaningful when examined concurrently with data from the reports of the other two sub-committees. All questionnaires together with extensive supporting documents are on file in the Teacher Education office of the State Department of Education.

A tabulation of certain selected items is attached.

# REPORT OF SELF-EVALUATION BY TEACHERS OF THEIR PREPARATION PROGRAMS AND EVALUATION OF TEACHER COMPETENCIES BY ADMINISTRATORS

## Table I

### TEACHER SELF-EVALUATION AVERAGE SCORES (PERCENT) BY EXPERIENCE

| Total | *32,506 | | | | | |

*Note - There is a difference of 183 in the totals of Tables I and II. This is .0056 percent, which does not affect the results. This

1. These scores show that the teachers and school administrators classify the teacher preparation programs as being mediocre and not excellent. If they were to be given a report card with a letter grade as they usually are on a scale with the highest being 100%, they would receive on the average a "C" rather than an "A" or "B".
2. The scores show very little difference in competency between teachers with five years experience and those with over five years of experience. Experience after the first five years does not increase scores on the evaluations by the teachers or the administrators.
3. The administrators gave a higher score on the performance of teachers than the teachers gave on the programs from which they graduated. The teachers with 0 - 5 years of experience were given a grade of 9.3% higher than they gave their teacher preparation programs; those with 6 - 10 years experience were given 10.9% higher; and those who had over 11 years experience were given 7.37% higher.
4. According to the way teachers rated their preparation program and administrators rated the performance of teachers, the institutions provide less quality in teaching teachers how to plan than is provided in teaching instructional strategies or managerial and professional competencies. They teach professional competencies better than they do planning, instructional strategies or managerial competencies.

1. The evaluation of teacher preparation programs by the elementary and secondary teachers showed very little difference in the scores of elementary versus secondary teachers.
2. The administrators evaluated the elementary teachers slightly higher than they did the secondary teachers.
3. The administrators evaluated the elementary and the secondary teachers considerably higher than the teachers evaluated their preparation programs.

** Evaluation forms not properly completed and not included in any further calculations

The responses by program received on the evaluations varied in number from 10 to 4,202. The responses indicate that the ten programs (37% of the institutions) with the largest number of responses (21,116) trained 75% of the teachers who were educated in Alabama programs. At the other extreme, the ten programs (37% of the institutions) with the smallest number of responses (1,064) trained only 5% of those teachers who were educated in Alabama programs.

The above table shows the following: (Table VI)

I. Programs Above Average:

  A. There were three programs evaluated above average according to teachers and administrators in all experience categories.

  B. There were seven programs evaluated above average on any five of the six experience categories according to teachers and administrators.

  C. There were eleven programs evaluated above average by teachers in all three experience categories.

  D. There were ten programs evaluated above average by administrators in all three experience categories.

II. Programs Below Average:

  A. There were two programs evaluated below average according to teachers and administrators in all experience categories.

  B. There were two programs evaluated below average by teachers and administrators on five of the six experience categories.

  C. There were ten programs evaluated below average by teachers in all three experience categories.

  D. There were five programs evaluated below average by administrators in all three experience categories.

## III. Conclusion drawn from Table VI

The evidence indicates that the administrators evaluated the performance of the teachers, by programs, at a different level from that which the teachers evaluated their preparation in those programs. Although there are obvious deviations from the average, these deviations cannot be used to conclude that one program is necessarily better than another program. There are many instances which show that a particular program is evaluated above the average by teachers while the performance of these teachers evaluated by administrators is below the average and vice versa. The evidence indicates that all programs have great need to be strengthened, inasmuch as no program is evaluated as being excellent.

Table VII, on the following pages, shows the percentage of responses given by teachers with 0 - 5 years experience to each of the competencies listed on the questionnaire. This table gives the Institutional Code Number for the purpose of making it possible for each institution to identify its teacher preparation program and make comparisons with the other programs throughout the State. Note that the rating scale used on the evaluation instrument is used in Table VII. The figure under each item of the rating scale is the percentage of the teachers in that program which assigned that rating.

To illustrate, let us identify number 2 under the program code number as institution "A". Under Competency 1, rating 1, we find that 8.08 percent of the teachers in institution "A", or program 2, expressed themselves as feeling that preparation for this competency was inadequate. Whereas, under Competency 1, rating 5, we find that 8.30 percent of the teachers in institution "A", or program 2, expressed themselves as feeling that the preparation was excellent.

*Source is Table VII.

**Indicates the number of programs in each category.

The six listed competencies taught in teacher preparation programs and evaluated by at least 25% of the teachers from those programs as being taught inadequately and/or less than satisfactorily as indicated in Table VIII are as follows:

1. Responsibility in keeping and producing reports and records
2. Allow students to actively participate in the planning of learning objectives
3. Use of community resources
4. Skill in the use of instructional equipment (hardware)
5. Involve students in evaluating their achievement objectives
6. Use objective criteria for determining entry level of students

The six listed competencies taught in teacher preparation programs and evaluated by at least 25% of the teachers from those programs as being taught in an excellent manner as indicated in Table VIII are as follows:

1. Write learning objectives
2. Act in a cooperative, supportive and considerate manner in working with (a) staff
3. Act in a cooperative, supportive and considerate manner in working with (b) students
4. Act in a cooperative, supportive and considerate manner in working with (c) community members
5. Knowledge of the Teacher Code of Ethics
6. Apply professional knowledge to teaching practice

It is apparent that teachers indicate that their preparation programs should do a much better job in teaching how to produce and keep reports and records, lead pupils to actively participate in planning their learning activities and in the use of community resources. They also indicate that tremendous improvements can be made in teaching needed skills in the use of instructional equipment (hardware), the involvement of students in evaluating their achievement objectives and in the use of objective criteria for determining entry level of students.

The responses indicate that most programs are doing a satisfactory and/or good job in teaching the majority of competencies, but all programs can be improved. The responses also indicate that areas of competency where teacher preparation programs are providing excellent instruction are in writing learning objectives and in acting in a cooperative manner in working with staff, students and community members.

They further indicate that excellent preparation is being given in applying professional knowledge to teaching practice and in knowledge of the Teacher Code of Ethics.

Table IX shows the percentage of total responses for each listed competency according to the rating scale used on the evaluation instrument. This table gives the data for each County and City system in the State. The counties and cities can be identified by the number in the first column by matching this number with the listing of counties and cities on the back of the evaluation instrument in Appendix "C". To illustrate, number 1 on Table IX corresponds to 001 on the evaluation instrument, Autauga County. Number 102 under the table for cities is Alex City.

The information in Table IX, for example, indicates that 0.81 percent of the teachers in Bullock County, number 6, say that preparation to "allow students to determine their learning needs" was inadequate, 7.31 percent was less than satisfactory, 28.45 percent was satisfactory, 47.96 percent was good and 15.47 percent was excellent. In contrast to Bullock County, number 16, Coffee County teachers show the following percentages: 19.58% inadequate, 24.74% less than satisfactory, 41.73% satisfactory, 12.73% good and only 2.08% excellent. There are, therefore, wide variations among the various school systems in the evaluations made by the teachers.

The information contained in these tables may be useful to County and City school systems in planning in-service programs, inasmuch as the teachers have indicated strengths and weaknesses in the areas of preparation according to the items used on the evaluation instrument for this project.

## SUMMARY OF REPORT

One approach used in this study was to survey the Colleges and Universities to determine their student requirements and regulations for entrance, retention and completion of teacher preparation programs. All teachers employed in the various County and City School Systems were given the opportunity to evaluate the teacher preparation programs from which they received their preparation. There was a remarkable degree of cooperation by institutions of higher education, local school systems and the State Department of Education. There was one hundred percent participation by all institutions of higher education with teacher preparation programs and all County and City School Systems. Approximately 96 percent of all teachers completed the evaluation forms. There were 32,790 teachers who completed the forms. Approximately the same number of forms were completed by the administrators in their evaluation of the competencies of the teachers.

Shd tchrs be primary evaluators?

The thirty-six member State-wide Committee charged with the responsibility for conducting the study included members from all facets of education as well as lay citizens.

### Entrance and Retention Requirements

There are 27 institutions with teacher preparation programs in Alabama. Thirteen are public institutions which produce 85% of all teachers at the "B" level of Certification, 97% at the "A" level and 100% at the "AA" level.

Approximately 50% of all certificates recommended by the institutions of higher education are at the "B" level, although the trend shows that this is quickly changing and it is likely that most certificates issued this year and for several years to come will be at the "A" and "AA" levels.

Five institutions produced 55% of the "B" certificates during the period studied, 5 produced 67% of all "A" certificates and 5 produced 88% of all "AA" certificates.

Admission policies vary. All institutions require a high school diploma or equivalent, and most require test scores, but often there is no specific test score cited. Apparently, the most common approach is to use the high school grades and test scores in combination to make admission decisions.

Most schools require a higher grade point average to get into teacher education programs and student teaching than is required for graduation in other areas of study. Relatively few applicants are rejected for teacher preparation programs. Most schools point out that those students not likely to be accepted do not apply.

?!

GRADE INFLATION!?

Most schools have clear probation and drop policies, and all appear to use guidance conferences with students, especially in the student teaching process.

Teacher education programs in the State vary from small to large. While there is a wide variation among institutions in test scores of students admitted, there is little difference in test scores between education and non-education students at a given institution.

The procedures by which students are admitted to and complete teacher education programs at most institutions are reasonably well defined and have a great deal in common on paper.

## Completion Requirements

The maximum number of hours that can be transferred from one institution to another for the Bachelor's degree varies from 64 sememster hours to 100 semester hours. Some schools have no policy.

The maximum number of hours of professional education that can be transferred varies from zero (0) hours to 165 quarter hours. Some schools have no policy.

The size of schools of education varies from a student enrollment of 17 to 1,106. The number of full-time professors employed varies from one (1) to 165.

Approximately six out of seven (87%) of the full-time professors employed in the schools of education in Alabama were formerly elementary or secondary teachers.

The number of hours credit for student teaching ranges from six (6) semester hours to twelve (12) semester hours. The number of weeks in student teaching ranges from eight (8) to sixteen (16).

The number of required credit hours for courses in materials and methods ranges from 6 semester hours to 32 semester hours for elementary teachers and from 3 semester hours to 8 semester hours for secondary teachers.

These responses indicate that there are many differences in the teacher preparation programs in Alabama. The question to be resolved is should these differences be made more pronounced, less pronounced or remain about the same.

## Teacher and Administrator Evaluations

The responses from 32,790 teachers and 32,506 evaluations by administrators on teachers indicate that much improvement must be made in Alabama's teacher preparation programs before we can classify them as being excellent. According to these responses Alabama's teacher preparation programs can be judged as being mediocre.

The responses on the evaluation instrument indicate that experience after the first five years does not increase the competency of teachers.

The administrators gave a higher evaluation on the performance of teachers than the teachers gave on their programs from which they graduated.

The evaluations showed very little difference in teacher preparation programs for elementary versus secondary teachers.

The administrators evaluated the competency of elementary and secondary teachers considerably higher than the teachers evaluated their preparation programs.

The responses indicate that the ten programs (37% of the institutions) with the largest number of responses (21,116) trained 75% of the teachers who were educated in Alabama teacher preparation programs. The ten programs (37% of the institutions) with the smallest number of responses (1,064) trained only 5% of those teachers who were educated in Alabama teacher preparation programs.

The responses from teachers and administrators show that several programs are evaluated above the average by teachers while the performance of these teachers evaluated by the administrators is below the average and vice versa. The evidence indicates that all programs need to be strengthened.

The responses from teachers indicate that the competencies taught best in the teacher preparation programs are as follows:

A. Writing learning objectives

B. Act in a cooperative, supportive, and considerate manner in working with staff, students, and community members

C. Knowledge of the Teacher Code of Ethics

D. Apply professional knowledge to teaching practice

Those competencies taught the least effectively are as follows:

A. Responsibility in keeping and producing reports and records

B. Allow students to actively participate in the planning of learning objectives

C. Use of community resources

D. Skill in use of instructional equipment (hardware)

E. Involve students in evaluating their achievement objectives

F. Use of objective criteria for determining entry level of students

Responses from teachers employed in county and city systems indicate that there is a wide variation, by school systems, in their evaluation of their teacher preparation programs.

# APPENDIX "A"

# QUESTIONNAIRE ON ENTRANCE--RETENTION REQUIREMENTS FOR TEACHER PREPARATION PROGRAMS IN THE COLLEGES AND UNIVERSITIES IN ALABAMA

# SURVEY FORM - SUB-COMMITTEE I

This requests information about some elements of your teacher education program. The data relate mostly to admission and retention. Please provide as full and accurate information as you can. If the space provided for certain responses is insufficient, we will appreciate the attachment of any documents or statements which expand or clarify the response. We hope for an October 15 deadline. Thank you.

## I. General:

1. Name of Institution:____________________________________________

2. Check degrees offered in Education: Bachelors'___ Masters'___ Ed.S. or other 6th Year___ Doctorate___

3. Levels of certification offered: B___ A___ AA___ Other___

4. Check degrees or certification levels approved by SACS.____ State____ NCATE___

5. May undergraduate students enroll in A & S units, enter the TEP and complete certification requirements? Yes___ No___

6. If the answer to # 5 is yes, do Education students take the same discipline major as the A & S majors? Yes___ No___

7. If there are different major subject matter requirements for Education and A & S students in the TEP, do faculty members from the discipline area participate in planning the subject matter for Education students? Yes___ No___

8. How many students have completed requirements for certification at your institution since September 1974? B_______ A_______ AA_______ Other_____

9. Make any clarifying comments you wish on items 1-8.

## II. Undergraduate Programs:

1. Give a brief statement of undergraduate admission criteria to your institution.

2. Are these criteria the same for admission to the unit for Education? Yes___ No____

3. If above is no, state briefly the Education requirements.

4. Is there a formal admission procedure to TEP itself subsequent to enrollment in the Education unit? Yes____ No____

5. Does this require action of a committee? Yes___ No___

6. Is a particular GPA required for admission to TEP? Yes____ No____
What is the GPA?________

7. Are personality variables considered in TEP admission? Yes___ No___

8. State any additional GPA or other criteria for TEP admission.

9. Estimate the percentage of applicants for TEP who are turned down____________.

10. Is admission to student teaching determined by committee action? Yes___ No___

11. Please state briefly any special GPA, test scores, or other criteria required for student teaching.

12. Do cooperating teachers in the schools participate in evaluating student teachers? Yes___ No___

13. Are there additional special GPA or other criteria for a particular certification major in your TEP? Yes____ No____. Please explain if yes.

14. Is the GPA required for graduation via the Education unit different from that required by the institution at large? Yes____ No____. If so, please explain

15. Do you have an Office for continuous program evaluation and follow-up of graduates? Yes____ No____. A committee? Yes___ No____.

16. State briefly the "probation" and "drop" policy for undergraduate students in Education.

17. If possible, please give the median ACT scores of students admitted to TEP over the last 2 years:______. Median ACT scores of non-education students admitted to your institution over the past 2 years:______.

18. Are TEP admission requirements and other procedures for transfer students the same as those for students who enter your institution as freshmen? Yes___ No___.

19. If you have any data on education vs non-education students in non-professional courses, please note them briefly.

III. Master's Program:

1. Please state briefly the minimum test scores and GPA required for admission to graduate study in an unconditional status. If you do not use a "cut-off" system, describe procedure briefly.

2. Give information requested above for "probationary" admission.

3. What are "drop" conditions for students admitted unconditionally?

What are "drop" conditions for students admitted on probation?

4. What is the minimum number of hours in the teaching discipline required for the M.A.? Sem. Hrs.____ Qrt. Hrs.____

5. Is a final comprehensive examination required for the M.A.? Written____ Oral____ Either____

6. Is a thesis required? Yes___ No___

7. How many M.A. level students have been admitted to your program since June, 1974? ______

If possible supply the following data for these students:

Test Scores

| | 25%tile | 50%tile | 75%tile |
|---|---|---|---|
| NTE | | | |
| GRE | | | |
| MAT | | | |
| Other | | | |

8. Are there differing admission requirements for different certification areas of professional specialities in your unit? Yes___ No___

9. What is the overall GPA required for graduation?_______

10. A brief statement of your "transfer" policy at this level.

## IV. Ed.S., 6th Year, or "AA" Programs:

1. State briefly admission criteria for this program:

2. How many hours subsequent to the M.A. are required?_______

3. Minimum hours required in teaching major for secondary students?______

4. What is "drop" policy for students at this level?

5. Is a thesis or project required for completion? Yes____ No____

6. Is a final comprehensive exam required? Oral____ Written____ Either____

7. No of students admitted at this level since June, 1974?_____.

If possible, supply the following information for these students:

Test Scores

| | 25%tile | 50%tile | 75%tile |
|---|---|---|---|
| NTE | | | |
| GRE | | | |
| MAT | | | |
| Other | | | |

8. Overall GPA required for graduation?______

9. Briefly state your transfer policy at this level.

10. Does your institution have approved graduate programs and degrees in the teaching fields in which advanced certification is available? Yes__ No__

11. Does your Education unit have approved post-masters course sequences in the professional education specialities where the "AA" is available? Yes__ No___.

# GENERAL INSTRUCTIONS

Please enter in all boxes the correct codes which identify specific fields, and mark below the boxes the corresponding numbers. Always enter the last two digits to identify year. Always enter zeros if field is not applicable unless otherwise instructed. A list of codes which identify institutions, fields of preparation (subjects), and school systems is printed below for your use.

**FIELD 1.** Enter the code which identifies the institution where basic preparation was completed.

**FIELD 2.** Enter the year you completed basic preparation.

**FIELD 3A.** Enter the code which identifies your major field of preparation.

**FIELD 3B.** If you had a second major field of preparation, enter the code.

**FIELD 4A.** If you completed graduate study, enter the code which identifies the institution.

**FIELD 4B.** If you completed graduate study at a second institution, enter the code.

**FIELD 5.** If you received a Master's degree, enter year you completed work.

**FIELD 6.** If you received a AA certificate, enter the year you completed work.

**FIELD 7A.** Enter the grade level you are teaching. If kindergarten, enter two zeros.

**FIELD 7B.** If you are teaching an additional grade, enter the grade level.

**FIELD 8A.** Enter the code which identifies the subject you are teaching. If self-contained class room teacher, enter two zeros.

**FIELD 8B.** If you teach a second subject, enter the appropriate code.

**FIELD 9.** Enter your total years of experience, including the current year.

**FIELD 10.** Enter the school system where you are employed.

**FIELD 11.** Enter the years of experience, including the current year in the school system where you are currently employed.

**USE NO. 2 PENCIL ONLY**

# GENERAL INSTRUCTIONS

Please enter in all boxes the correct codes which identify specific fields, and mark below the boxes the corresponding numbers. Always enter the last two digits to identify year. Always enter zeros if field is not applicable unless otherwise instructed. A list of codes which identify institutions, fields of preparation (subjects), and school systems is printed below for your use.

**FIELD 1.** Enter the code which identifies the institution where basic preparation was completed.

**FIELD 2.** Enter the year you completed basic preparation.

**FIELD 3A.** Enter the code which identifies your major field of preparation.

**FIELD3B.** If you had a second major field of preparation, enter the code.

**FIELD 4A.** If you completed graduate study, enter the code which identifies the institution.

**FIELD 4B.** If you completed graduate study at a second institution, enter the code.

**FIELD 5.** If you received a Master's degree, enter year you completed work.

**FIELD 6.** If you received a AA certificate, enter the year you completed work.

**FIELD 7A.** Enter the grade level you are teaching. If kindergarten, enter two zeros.

**FIELD 7B.** If you are teaching an additional grade, enter the grade level.

**FIELD 8A.** Enter the code which identifies the subject you are teaching. If self-contained class room teacher, enter two zeros.

**FIELD 8B.** If you teach a second subject, enter the appropriate code.

**FIELD 9.** Enter your total years of experience, including the current year.

**FIELD 10.** Enter the school system where you are employed.

**FIELD 11.** Enter the years of experience, including the current year in the school system where you are currently employed.
